Education

Vellore Institute of Technology, India

2023 – 2027

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) — CGPA: 7.92

Technical Skills

- **Programming Languages:** Java, Python, SQL
- **Core Computer Science:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Backend Development:** FastAPI, REST APIs, PostgreSQL, Microservices
- **AI & Machine Learning:** Scikit-learn, NLP, spaCy, LangChain, Google Gemini API
- **Tools & Development:** Git, GitHub, Docker

Work Experience

Paws Pal Connect - Backend Developer Intern

Dec 2025 - Mar 2026

(FastAPI, REST APIs, PostgreSQL, Pydantic, Git/GitHub)

Bangalore

- Developed and maintained RESTful APIs using Python, FastAPI, and PostgreSQL, supporting reliable data processing and scalable backend workflows.
- Optimized database operations and investigated backend issues through data validation, testing, debugging, and systematic error analysis.

ASGRV Solutions Pvt. Ltd. - Software Developer Intern

Jun 2025 - Dec 2025

(FastAPI, REST APIs, Microservices Architecture, SQL Databases, Pydantic, JSON, Git, Async APIs)

New Delhi

- Built a Smart Search microservice using Python, FastAPI, and SQL databases, reducing data retrieval latency by 30% through efficient data processing and backend optimization.
- Designed secure RESTful APIs and production-ready services that streamlined operational workflows and reduced server load by 10% during peak usage.

Projects

FinTech Dashboard & Predictive Analytics | Live Demo | GitHub

(Python, Scikit-learn, Streamlit, Git)

- Built an interactive financial analytics dashboard using Streamlit, Python, and live financial APIs to analyze portfolio performance, visualize trends, and support data-driven investment decisions.
- Processed and analyzed financial datasets using Pandas and Scikit-learn, developing predictive models with 85% accuracy and generating dashboard-ready insights through interactive visualizations.

AlgoSENSEI | AI Coding Mentor & Interview Platform | Live Demo | GitHub

(Python, FastAPI, LangChain, Google Gemini API, REST APIs)

- Designed, built, and launched AlgoSENSEI, an AI-powered learning platform featuring Socratic tutoring, automated code reviews, mock interviews, and learning analytics from concept to deployment.
- Owned the end-to-end product lifecycle by defining feature workflows, building modular FastAPI services, deploying on Vercel and Render, and continuously iterating on usability and feature delivery.

Smart Resume Analyzer | Live Demo | GitHub

(Python, FastAPI, NLP, spaCy, Scikit-learn)

- Built an NLP-based resume parsing and classification system using **spaCy** and **scikit-learn**, achieving **95%** accuracy in skill extraction and candidate evaluation.
- Developed **RESTful APIs** and deployed the application using **Gunicorn** and **Nginx**, implementing a weighted scoring system that improved candidate ranking accuracy by 20%.

Leadership & Achievements

- **University Sports Secretary, VIT Bhopal** – Selected twice as University Sports Secretary from a student body of 16,000+, leading 300+ volunteers and coordinating cross-functional teams to successfully execute AdVITYa 2024–2026 for over 1,500 participants.
- **Research Paper Accepted** – “Hybrid Attention Network with TabNet Benchmarking for Breast Cancer and Heart Disease Classification” accepted at the **1st International Conference on Smart Technologies and Intelligent Computing (INCSTIC-2025)**.
- **India Innovates 2026 National Hackathon Finalist** – Ranked among the Top 600 teams out of 35,000+ participants nationwide for developing a Hyperlocal Flood Intelligence System.
